### Street Name Pre-Type

For numbered (or, occasionally, lettered) jurisdictional routes, the [Street Name Pre-Type](#) includes the type word as well as the jurisdiction name and the administrative type of road. The following examples show the parsing of jurisdictional route names:

- Highway 101: [StN PreTyp](#) = "Highway"; [StreetName](#) = "101"
- County Road 88: [StN PreTyp](#) = "County Road"; [StreetName](#) = "88"
- Rhode Island Route 4: [StN PreTyp](#) = "Rhode Island Route"; [StreetName](#) = "4"
- Texas Ranch-to-Market Road 2398: [StN PreTyp](#) = "Texas Ranch-to-Market Road"; [StreetName](#) = "2398"
- Summit County Road XX: [StN Pre Typ](#) = "Summit County Road"; [StreetName](#) = "XX"
- United States Highway 99: [StN PreTyp](#) = "United States Highway"; [StreetName](#) = "99".
